DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record taken alone or in combination with other does not teach or suggest an information processing system and a method for a host computer, a storage device and a management server for judging whether or not communications paths from said plurality of adapters to a cache memory can be secured in the event of at least one of the processors being blocked off, based on information relating to communications paths from the plurality of adapters to the plurality of host side ports and sending a notification to said management server via the communications circuit, if it is judged that the communications paths can be secured, indicating that it is possible to block off the processor for which said judgment was made, in combination with other limitations of the claims such as the information processing system comprising: a host computer having a plurality of adapters, a storage device having a plurality of host side ports connected to the host computer, a plurality of processors for controlling the plurality of host side ports, a cache memory, connected to the plurality of host side ports, for temporarily holding data in response to commands from the host computer, a shared memory for accumulating information relating to an internal composition of said storage device for reference by the plurality of processors and an internal management device for outputting said compositional information to an external device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
